

Mike

(1)

I was able to coordinate the schedule's of the water testing company and my well drilling company. Not without difficulty though, you see my well man's father had a heart attack the day before and Keith Hull my well man had to take his father to the hospital leaving me without anyone to pull my well pump at my house and my water test company representative already in route to my house to collect samples. Fortunately I was able to have Keith's brother and another employee of theirs reschedule their day and make it to my place in reasonable time to do what had to be done here. Everything went fine and I was able to get a sample of the dark grey muck from my new well pump they had installed in October 2013. I was worried the debris might have washed away over the past 8 months but the new pump had some debris on it although not nearly as much as the old pump that was completely covered in the debris, it did have a fair amount of debris around the intake of the pump. The guys who pulled my pump also confirmed that they too had never seen whatever was on the pump ever before. So I now have 3 of the Hull boys telling me they have never in the last 50 years of their experience in Centre County ever seen anything but lime scale on anybody's well pump ever before here in Centre County. They confirmed they never ever saw that dark grey material in any well ever before. They did show me some bacteria on my supply line that was a darker black color.

The testing will be complete in about 3 more weeks and I used the rest of my cash to have the full fracking package test done that includes radio logicals and over 50 other elements. That package costs \$1465.00 and I added Cyanide and Antimony and the muck on my pump will be added extra charge as well. I eliminated some of the secondary elements from the package like Iron and magnesium, ect. because I already knew these elements were present and did not want to pay again for their testing.

Mike I want you to understand I will be bankrupt soon after all the testing and money spent since March 2010 fighting the fracking company NCL of the Woodlands Texas. I was making money developing property and building houses and after 3 years of hell doing nothing and having my property rendered worthless and unsafe all my cash is all but gone. After I finally get these test results and with finally getting a thorough test done hopefully I will finally

that last shower at my house back in October 2013 and although the volume of the ringing has reduced a little the ringing persists fairly loud every waking minute ever since. the steam from my dishwasher that made my eyes water uncontrollably and swell almost completely shut sending me to my local Emergency Room the next morning that four blood tests as far as I know did not confirm anything might finally be known to me. that is if I have the cash to get medical attention after all this time finally knowing what is in my water.

On September 23, 2013 I first called the Philadelphia EPA and talked to you! I told you about the muck on my well pump, what my well man told me and that I had concrete proof of what happened here, you told me to contact the DEP. I said to you aren't you interested in doing anything yourself as I have just told you I have concrete proof of fracking pollution of my water well. You simply said it's the DEP's job. verbatim!

I must admit I was surprised by your reply as I knew it was your job as well. Giving a lot of thought to what has transpired over these last many months I can't help but wonder.

I know that the case of fracking pollution in North East PA, you guys investigated where you issued a cease and desist order to the fracking company and a settlement to the citizen victim happened before I first called you and was in the jurisdiction of Williamsport Regional DEP and probably was handled by Dave Engle and Marcus Kohl. The victim citizen's had to call the DEP first yet clearly they did not receive any help or justice from DEP!

Nice guy Dave Engle as you called him did nothing. Exactly what he did for me even when confronted with a clear ponderance of concrete proof of water tests showing toxic levels of numerous toxic levels of Lead, Arsenic, beryllium, Antimony, Strontium, on my tests done in November of 2010 all carcinogens that only elevated significantly on the following DEP test done in September 2013 to levels that can only be called extremely toxic. yet you sent me a letter telling me I had no proof? Dave Engle ignored the word of an authoritative expert here in Centre County my well man who told him nobody here ever had anything on their well pump before but lime scale yet alone all that dark grey muck and fracking debris that DEP's own tests confirmed was Antimony-2.56- Arsenic 7.920- Beryllium 1.28- and Barium 4733 an element my well man

has stated he has never seen before here ever get alone at an elevated level such as 4732. Barium a signature fracking element. All ignored by Dave Engle and Marcus Kohl. Two guys who have never in the last 4 years ever signed off on any fracking pollution in their DEP Region of Pennsylvania. Every 100% of the time, the evidence is already conclusive. I know my New

their DEP Region of Pennsylvania. I know my new
Mike the evidence is already conclusive. I know my new
tests will reveal only more of the same toxic elements
that already are present in my previous tests. Perhaps
new toxic elements and radioactive elements as well.
will call you on the phone you told me

New toxic elements and radon. The last time I talked to you on the phone you told me to send my new tests results to DEP. Do you really believe they are going to do anything after all this time and all you know about them. You still persist in fantasy land. Your inaction forced me to live without you here through your inaction forced me to live without you here in my house I can't

You have through your inaction forced me to go without water in my house I can't take a shower or having any water in my house for 7 months use for anything but flushing my toilets for experts in now. I'm not going to go into what you told me then reversed your office said about my tests that you then told yourself on after talking to Dave Engle who I told you only repeated to you what that criminal Bryan Gram told him about Barium that does not apply to my case here in Centre County. After all I have told you about D.E.P and Bryan Gram you should have already contacted P.I.A. investigative Authority. The town of Mountain View has

my neighbor next door had their water tested at 1029 and had a toxic level of lead confirmed at 8029 and now after 8 months had their operation shot down for more than October about now after Sam Jones notified them back in working mirrors my water; their fracking operation when working mirrors problems. What a coincidence! I am a hellbilly

Now after seeing their Fracking operation
my water; their Fracking operation
my water problems. What a coincidence!
my other neighbors here in my subdivision are hillbillies
who don't get it! I believe it would be impossible for
at least two of the families below me not to have
toxic water. But to my surprise none of them ever
drank their well water. They all get their drinking water
all along from the spring I now get my water. I told them
showing in the potential toxic was reason enough to test.
but I'm not sure I got through to them. There are 4 family
but I can't tell Horner on Trestle Rd.

get on with my life and rebuild elsewhere. My patience is exhausted, and you positively know by now what happened here at my place and all the criminal bullshit surrounding this fracking nightmare our incompetent President who legalized it and foolishly did not believe federal oversight was necessary, forced on American's like me.

I'm INSISTING you take action upon receipt of my new testing results!

Nothing less will be ~~acceptable~~ acceptable at this point! What I told you about Summit Lodge is real. Using the legal system here is impossible, you are our only hope for justice.

I need your help Mike,

Donald R Ludwig 6/28/14

Other residents in my subdivision need help. Their water has set to be toxic as well and I've done all I can do. I know them but not that well we all have several acres for privacy and I'm not from Snow Shoe so I don't really know them all that closely. 6 family's in subdivision total.
